

3.2.A.4.2 CoA of the trypsin used during the CHOK1 cell adaptation

Certificate of Analysis

**Trypsin-EDTA (1X), liquid
.25% Trypsin with EDTA**

Catalog Number: 25200
Lot Number: 774748

Storage Temperature: -5 to -20C

Expiration Date: 30 Oct 11

FOR RESEARCH USE ONLY. CAUTION: Not intended for human or animal diagnostic or therapeutic uses.

Porcine Parvovirus and Mycoplasma testing are performed on raw stock trypsin.

This note is to inform you that this lot of product was filled in the new GIBCO bottle design. The bottle resin (PET) remains unchanged to the existing GIBCO EZ-Hold bottle. The cap material was changed from Polypropylene (PP) with a Saran®, Polyvinylidene Chloride (PVC) liner to a liner-less High Density Polyethylene (HDPE) cap. The labels were adjusted in size and shape to accommodate the new bottle with minimal change to the format and font size of the text. If you have further questions about this change, please contact your Account Manager or Invitrogen Technical Service at 1-800-955-6288 or email address: techsupport@invitrogen.com.

Testing is listed in alphabetical order.

TEST	SPECIFICATION	RESULT	UNITS
¹ In-Vitro Bioassay	Acceptable	Acceptable	
² Mycoplasma Testing	Negative	Negative	
³ Osmolality	>=270 to <=320	290	mOsm/kg
⁴ pH	>=7.2 to <=8.0	7.5	
⁵ Porcine Parvovirus Testing	Negative	Negative	
⁶ Sterility Testing	Negative	Negative	

A handwritten signature in black ink, reading 'Barbara J. Schueler'.
